

A FEW THINGS ABOUT ME

I spend my time learning stuff in the university, completing assignments and play games in my free time. As I am a fast learner, I like to learn new languages (both programming and physical ones). I don't have work experience yet in the science of informatics. I'm more of a lone wolf when it comes to projects, but I've been learning to work as a member in a team and co-operate with others for the past 3 years.

EDUCATION

Undergraduate

2019 - (most likely 2023)

Ionian University

I study various things about information handling, processing and protection along with network structure and language programming (C, C++, Java, Python, SQL) and hope to have my postgraduate degree on Network Security.

EXPERIENCES

I haven't had any experiences in a professional environment yet.

SKILLS & PROFICIENCY

Python

Java

HTML

HTML5 & CSS

SQL

C
